CAREER OBJECTIVE

Backend-focused Web Developer with hands-on experience in Python, Django, and RESTful API development. Passionate about building secure, scalable backend systems. Strong foundation in DSA and competitive programming with **592+ problems solved** across Codeforces (Max Rating: 997), CodeChef (2 star), and LeetCode. Ready to contribute high-impact backend solutions in a dynamic team environment.

SKILLS

Languages: Python, C++, JavaScript | **Backend :** Django, DRF | **Frontend:** HTML, CSS, Tailwind, Bootstrap, React

Databases & Caching: PostgreSQL, MySQL, Redis | **APIs &Auth:** REST, JWT, Djoser, Swagger/OpenAPI

Tools: Git, GitHub, Postman, Cloudinary, Vercel, Render, Supabase

Payment Integration: Stripe, SSLCommerz | **Core:** DSA (592+), Problem Solving, Scalable Backend Design

PROJECTS

1. Driver Safety Monitoring System (SaaS):

[Live Link](#) | [API Docs](#) | [GitHub](#)

Overview: A real-time driver monitoring SaaS platform that detects drowsiness, distracted or emergency situations and rings Voice alarm then sends instant Email alerts with driver image and location to vehicle owners, ensuring road safety through AI-based detection and scalable backend services.

- Led a 2-member team and designed the full system architecture
- Built real-time driver drowsiness detection using TensorFlow.js & facial landmarks
- Developed complete backend independently using Django REST Framework
- Stripe Subscription Base Payment With Webhooks
- Implemented instant Email notification to car Owner with Driver's Current image and Location for every Incident detection.

Technology: Django, DRF, PostgreSQL, Stripe, Claudinary, SMTP Email, Jazzmin (Custom Admin UI), Vercel

2. Green Harvest (E-commerce):

[Live Link](#) | [API Docs](#) | [GitHub](#)

Overview: A scalable e-commerce backend system for a grocery platform, supporting secure authentication, product management, order processing, and multi-gateway payment integration.

- Implemented JWT authentication with Djoser (email verification & reset)
- Designed product system with categories, filtering, and brand support
- Built cart, wishlist, and order management with transaction safety
- Integrated Stripe & SSLCommerz payments with webhook handling
- Optimized performance using **Redis** caching

Technology: Django, Django REST Framework, PostgreSQL, Redis, Stripe, SSLCommerz, Claudinary, Vercel

EDUCATION

National Institute Of Technology (NIT), Chittagong, Bangladesh

Diploma in Computer Science (CST) | 2022 – 2026

COURSES & PERSONAL ACHIEVEMENTS

CSE Fundamentals with Phitron | September 2023 - March 2025 (18 months) | [Certificate Link](#)

- Learned C, C++, DSA, Competitive Programming, Python, SQL, Django, DRF.

NIT Innovation Competition | Competition (November 2023) | [Certificate Link](#)

- Participated in the institute-level skill competition at NIT with a Driver Sleep Detection project using Python and Arduino, Awarded 2nd place with 30k prize money & certification.

NIT Innovation Competition | Competition (November 2024) | [Certificate Link](#)

- Institute-level skill competition with a Smart Gloves and Android App for A Modern Sign Language communication in Bangla Language for Deaf person who uses sign language, Awarded 2nd place with 30k prize money & certification.

ASSET Skills Competition | Competition (February 2025) | [Certificate Link](#)

- Participated in the ASSET skills competition for Python GUI Based Calculator APP and Awarded 1st place.

LANGUAGE

English (Fluent), Bangla (Native)
